

ARTwelding Welding Tractors

Built for tough use in the workshop, our Welding Tractors draw a robust design and high level of reliability. Available in different variants for the handling of challenging tasks, may our Welding Tractors with SAW, MIG/MAG, TIG or plasma technology be equipped.

CLIPPING FROM STANDARD PROGRAM				
Technical specifications	A1	A2	A4	A6
Wire diameter (mm)	2-3	3-5	3-5	3-6
Welding speed range (cm/min)	25-190	25-190	25-190	25-210
Wire feeding speed (cm/min)	60-580	20-170	20-170	20-170
Head moving range (mm)	100 x 100			
Head rotating angle (°)	360			
Head tilting angle (°)	45			
Flux hopper capacity (l)	10	10	2	10
Wire reel capacity (kg)	25	25	10	50
Weight (kg)	50	50	38	80

KZ-1 Welding Process Controller

Control circuit with programmable controller, with various unique functions, digital welding parameters display, with a wide speed-adjusting range for wire feeding. Constant speed wire feeding and variable speed wire feeding can be selected, applicable to a wide process scope.

- Welding speed
- Wire feed speed
- Welding process CV, CC, CW

Our tractors are ready for renting including welding equipment and flux recovery.
