

# Pipe Buggy

The safe and easy way to move pipes around the job site

## FEATURES and BENEFITS

- Flat free tyres
- Ratchet hold down strap to secure pipe
- Quick disconnecting handle for easy storage

The Pipe Buggy offers a safe method of handling and moving pipes around the workshop or site easily, avoiding damage to the pipe as a result of it being dragged along the ground.

At only 30kg it is a light weight yet robust solution to pipe handling problems. With its innovative handle and ratchet strap it allows the operator to lift the pipe from the floor onto the buggy with minimal effort.

Max. pipe diameter: 12" (305mm)  
 Max. recommended pipe length: 6.1m  
 Max. pipe weight: 450kg / 990lbs
